

PR-531

4 kg Gas Regulator

GA Item # 803132

The PR-531 4kg gas regulator is used as a manual control or primary regulator with heaters operating between pressures of 0.1–4.5 psi (5–310 mbar). A numbered dial (1–10) represents the output pressure from minimum to maximum. The PR-531 will control up to 12 M8's or 50 M2's and will withstand direct tank pressure.
